

Which ministries are working on energy sector in Myanmar?

There are several ministries that are working on energy sector in Myanmar. Ministry of Energy focuses primarily on exploration and production of oil and gas. Ministry of Forestry is responsible for biomass utilization planning. Parts of renewable energy development are within the scope of Ministry of Science and Technology.

What energy sources are available in Myanmar?

Myanmar is endowed with rich natural resources for producing commercial energy. Currently, the available energy sources in Myanmar are crude oil, natural gas, hydropower, biomass, and coal. Wind energy, solar, geothermal, bioethanol, biodiesel, and biogas are other potential energy sources.

Why is ee&c important in Myanmar?

In 2014 the government of Myanmar released the National Energy Policy, which highlighted the importance of EE&C for the country's long-term energy goals, and recognized the financial gap to finance projects, particularly in the industry sector.

What is Myanmar's energy policy?

Use of new and renewable energy sources is encouraged, especially solar and wind, which are abundant in Myanmar. The policy also accepts that people will still need to use traditional energy sources such as wood and charcoal. Regulations and anticipatory actions are necessary to sustain the harvesting of these primary energy sources.

Does Myanmar need electrification?

Electrification in Myanmar is the focus area that requires an urgent development. According to Myanmar Ministry of Energy in 2016, the electrification rate of Myanmar is only at 34%. This implies that around 36 million people remain without access to electricity.

What is Myanmar doing about energy efficiency & conservation?

To this end, Myanmar has implemented a range of energy efficiency and conservation goals and action plans targeting energy savings in all sectors of the economy and in cooperation with both the private and public sectors.
