Its independence from telecom operators allows the platform to offer full interoperability on both MTN Eswatini and Eswatini Mobile, which together provide for 99% of the market. This flexibility has made the platform particularly attractive in a market where telecom-backed mobile money services like MTN Momo previously held sway.

With regard to the topic, "Cutting greenhouse-gas emissions now with cooling and energy-efficiency", His Majesty was reported as stating that Eswatini had developed national energy strategic plans for proper and adequate development of its renewable capacity, and that "by 2030, we envisage more than 90 percent of our population having

The key challenge facing the country's energy system is a lack of security of energy supply: Eswatini imports around 70 percent of its power, despite being well-endowed with conventional and renewable energy resources, including coal, solar, hydro, wind and biomass residues from the sugar and forestry industries.
