

What is the energy mix in Benin?

Energy in Benin has a diverse energy mix and takes several forms including: solar, wind, hydropower, biomass, fossil resources, and mineral resources. Out of this energy mix, about 60% of energy comes from biomass. Benin is also dependent on energy imports from Ghana and Côte d'Ivoire.

Does Benin have a good energy sector?

This paper analyzed the energy sector in the Republic of Benin, a developing country in West Africa that has many problems in meeting the needs of its population for almost all sectors over the last decade, specifically, between 2010 and 2018, in terms of production, consumption, and imports.

Does Benin have electricity?

Electricity consumption in the Republic of Benin is highly dependent on external supplies, with 90% of the country's electricity coming from Ghana (Okanla, 2014, as cited by Kwakwa, 2018). Benin is subject to power cuts and recurrent energy crises, according to Atchike et al. (2020).

Is Benin energy dependent?

In 2015, Benin was energy and electrically dependent at 41.3% and 76%, respectively, which worsened given energy imports at 1319.45 GWh in 2018 relative to 1202.15 GWh in 2017, an 8.07% increase due to a 76.80% drop in national electricity production in this period.

Are there empirical studies on Benin's energy situation?

However, no empirical studies were found in literature on studies of the Republic of Benin's energy situation, and so more research and studies focusing on Benin are needed. Table 1. Summary of literature on the subject. 3. Benin's energy situation 3.1. Energy consumption

Does Benin have hydro power?

Hydro power potential According to the Biennial Update Report (BUR, 2019), Benin has many rivers surrounded by large basins in the West African sub-region, namely the Niger basin, the Volta basin, and the Mono-Couffo and Ouémé basins, as shown in Fig. 9.
