Does ExaGrid support Veeam accelerated data mover?

both the backup application as well as the backup storage. The combination of Veeam backups to the ExaGrid disk-cache Landing Zone, the integrated ExaGrid-Veeam Accelerated Data Mover, and ExaGrid's support of Veeam SOBR is the most tightly integrated solution on the market for   backup application to scale-out backup storage.Commvault

Does ExaGrid require rehydration?

ExaGrid refers to this capability as the "Landing Zone." Local restores,instant VM recoveries,audit copies and even tape copies do not require rehydration. Deduplication and replication are performed in parallel with backup jobs from the Landing Zone to the backend storage of the system. Only deduplicated data is replicated.

Can ExaGrid appliances be deployed in the backup application software?

and with ExaGrid there are no agents to deploy or manage.When comparing ExaGrid appliances deduplication in the backup application software,it is important to keep in mind that using deduplication in the backup application software typically requires greater resources on the backup

What is the difference between ExaGrid and exagr?

pository, allowing for a half-size system to be usedsite. ExaGrid is asymmetrical this use case where all other solutions are symmetrical.Cross protection - In this use case, data is backed up at both the ofsite and

---

onsite systems and cross replicated such that e h site becomes the disaster recovery site for the other.Multi-hop - ExaGr
