FIREPROOF LITHIUM BATTERY BOX

A fireproof battery bag is designed for Lipo batteries. It may be used when Lipo batteries are charging, on the go, or in storage. In addition to being fireproof, a battery bag may be waterproof and explosion-proof. Some bags are capable of withstanding fire and heat up to 1,000° F (550° C). They commonly feature a fire-retardant exterior

Enhanced Visibility: Equipped with high-visibility reflective tape, this lithium battery bag is easily located even in the dark. This feature adds an extra layer of convenience Safety First for Lithium Batteries: Store your lithium batteries securely with our specially designed 14"x 7.8"x 9.5" fireproof lithium battery bag.

Outstanding battery fire insulation performance. All the materials that are used are non-combustible and can withstand continuous temperatures up to 1100 C (2012 °F) The temperature of a Lithium battery fire can easily reaches 600 °C (1112 °F) In addition to the high temperature resistance, the thermal conductivity of the insulation material is extremely low,

A fully charged battery stores a tremendous amount of energy so that a thermal runaway may lead to severe consequences. That's why most airlines and logistics operators consider high-capacity Li-ion batteries dangerous. This fireproof battery box built for the Waydoo Power-flight battery is built tough to withstand high heat.

If they are regular Lithium Ion cells, especially ones from an old EV or 18650 batteries I would most certainly put them in something fireproof and also not in my house. I think it is worth building a fire resistant battery box out of cement board. Custom made so it fits your space. I like it. Many people coming out in favor of
