

Who regulates the energy sector in Cayman Islands?

Energy Sector Regulation by OfReg, Cayman Islands. OfReg is the Cayman Islands' independent economic multi-sector regulator. We regulate the energy market by promoting competition in, reliable supply, security, and the efficient operation of the Cayman Islands electricity industry for the long-term benefit of consumers at competitive prices.

Which energy sources are not included in Cayman?

Traditional biomass- the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important energy source in lower-income settings. Cayman Islands: How much of the country's energy comes from nuclear power? Nuclear energy - alongside renewables - is a low-carbon energy source.

What does Cayman electricity do?

We develop, administer, and enforce the regulatory framework that governs nearly every aspect of the Cayman Islands' electricity industry including transmission and distribution, system operation, security of supply, safety, reliability, and service. We also play an advisory role to Government on issues related to electricity.

Does Cayman have biomass?

Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important source in lower-income settings. Cayman Islands: How much of the country's electricity comes from nuclear power? Nuclear power - alongside renewables - is a low-carbon source of electricity.

Building upon the process developed to draft the 2017 NEP, the updated Policy draws upon inputs from Cayman Islands private and public sector stakeholders, and local and foreign experts advising on the current market context of energy sector reform topics, including energy efficiency, renewable energy, and electric vehicles.
