Hi we have a new PV installation - Solis Inverter RHI 6K 48ES 5G with a Fox ESS LV5200 Battery. we have seen some issues, but most resolved, however

Drain the existing battery to 50% (the new slaves come with 50% charge, this way they will match-up and balance better) Turn off the DC switches from the solar. Turn off the large red round power (kill) switch on the wall. Turn off the battery power switch. Remove the master battery. Place the 2 new slaves on top of the other slaves.

FoxESS Community - Owners & Installers Forum. This is a private, informal group designed as a support network for all FoxESS owners and installers. FoxESS. I decided to complement this a few days ago with a Fox battery storage system as follows 1 x KH9 inverter and 2 x EP11 batteries (with space for a third if necessary)

The ECS is a high-performance, scalable battery storage system. The modular design allows for maximum flexibility, making it suitable for a broad range of storage applications. Additional batteries can be installed in series. Installation ???

A week ago my battery decided to force charge - I put this down to the cold as did others on the FB group. For the last week I have been on IO and the batteries have been charging and discharging normally. Until last night. The battery (cube) was quite happy discharging powering the house. Then the force charge was suppose to start at midnight.
