After grants, worked out about 11k. We had 10 panels put in. As mentioned above, prices do seem to be quite variable. The 11k was the second cheapest we got, not the cheapest, but they were able to slot us in within a short time rather than the two to three months wait other installers had suggested - that would have put us online after summer.

Andrew and Daniel McHugh, dairy farming in partnership from Co Longford, became the first IFA and Bord Gáis Energy Solar customers to have their TAMS 3 grant-aided solar solution installed. Farmers nationwide who received funding approval in Tranche 1 of TAMS will follow them in the coming days and weeks, with panels scheduled for farm roofs

Yes, if your solar panels produce more electricity than you need, you can sell it back to the grid. This is called microgeneration. Bord Gáis Energy customers can do this by signing up to our Microgen Export Plan. For more information, see [What is microgeneration?](#)

Bord Gáis Energy has announced a deal to buy Swyft Energy, a solar photovoltaic (PV) provider in Ireland, for an undisclosed sum. Customers can save an average of 50-70% on their electricity

Solar panels that produce electricity are known as solar photovoltaic (PV) modules. Solar PV is the rooftop solar you see on homes and businesses across the country. Solar PV panels capture the light from the sun and convert it into the electricity that's used in your home to power your TV, kettle, phone charger, and so on.
