The U.S. Virgin Islands (USVI) is working with the Energy Department to transition from fossil fuel energy to the renewable resources that are abundant on the islands. By reducing its dependence on oil, the USVI is taking strides toward greater economic stability and a clean energy economy. With financial assistance from the Department of

Kupfer wondered how it is working given that the power demand is on the north shore of that island, but the facilities are on the south shore. He doesn't think the Virgin Islands would do well privatizing the utility. The islands are relatively small and spread out and a large company couldn't come in and share resources easily, he said.
