

How is electricity produced in French Polynesia?

Electricity production in French Polynesia is still heavily dependent on fossil fuels despite the development of renewable energy sources (REn). Electricity production and consumption are unevenly distributed over the territory as they are correlated with the geo- graphical distribution of the population.

What is French Polynesia's energy transition plan?

French Polynesia's energy transition plan has three main objectives: Change the energy model, by gradually replacing the use of fossil fuels with renewable energies in all activities

Who created the first electricity company in French Polynesia?

The first public electrical energy distribution company in French Polynesia was created in 1910 by Charles Ducorron. It was succeeded by the Etablissements Martin et fils, who held the concession for providing electricity in Tahiti.

Does French Polynesia rely on hydrocarbons?

French Polynesia, like most island territories, is highly dependent on hydrocarbon imports. In 2019, 93.8% of energy consumed in the archipelagos came from imports of various petroleum-based fuels. The renewable energy penetration rate in power generation stood at 28.78% in 2019. This figure has remained stable over the last five years.

How many gas stations are there in French Polynesia?

Until 2006, our strategy focused essentially on the development and consolidation of our position in French Polynesia, in Tahiti, but also in the outer islands. Leader on the market, our network has 14 gas stations today, in 4 islands (Tahiti, Moorea, Raiatea and Rangiroa).

Why are electricity prices higher in French Polynesia than in mainland France?

Electricity prices in French Polynesia are higher than in mainland France, due in particular to costs made higher by the remoteness and fragmentation of the electricity system, as well as by the absence of nuclear energy.

The objective is to prove that it is possible to produce carbon-free electricity thanks to the force of Polynesian waves and make French Polynesia more energy self-sufficient. Energy self-sufficiency is paramount for island territories
