#### Are solar panels a good option in France?

More and more companies are either selling, or installing, solar panels for people across France. This, coupled with rising energy costs, continues to make solar panels appear an attractive alternative of gas or electric energy sources, for both homeowners and businesses. Here we answer eight common queries about solar panel installation in France.

Can I install solar panels myself?

It is possibleto install the panels yourself, if you purchase solar-panel installation 'kits', which may include panel providers sending a certified electrician to sign-off on regulatory paperwork and check your installation. Read also: French city's plan to encourage residents to invest in solar panels What can I do with surplus energy?

Can I get a grant if I install solar panels?

Certain financial grants are only applicable if you install panels via an RGE-certified firm. If your solar panels are to be connected to the grid or have a storage system, the work must be approved by Consuel (Comité National pour la Securité des Usagers de l'Electricité).

How much do solar panels cost?

It can range from EUR1,290 to EUR9,000depending on the size of the installation,and is usually paid out in instalments over five years. For solar thermal panels you may be able to obtain an 'Energy Savings Certificate bonus' (Prime des Certificats d'Économies d'Énergie,or CEE).

How much power does a solar panel produce?

New-generation plug-and-play solar panels have an average power output of around 400 watt-peak\*(Wp) each, which is close to a standard photovoltaic module with a power output of between 375 and 500 Wp. Read also: MAP: How long before home solar panels cover costs in France?

How much electricity can a solar panel save?

The amount saved does of course depend on how much you are paying for electricity now, and how much sunshine your solar panels are able to use. This depends significantly on location; for example, in one year, an average solar panel will produce more electricity in Marseille (620 kWh) than in Paris (430 kWh).

3. Explore incentives and rebates. Incentives and state and federal tax rebates can substantially cut your overall costs to install solar. The Federal Investment Tax Credit (ITC) alone can save you 30% on the upfront costs for solar, with state and local rebates knocking the price down even more depending on where you live.. Given initial costs are an average of ???

A target of 75% of electricity production from the exploitation of renewable energies by 2030 has been set for the whole of French Polynesia. RE prioritization, portfolio standards: The operators of public electricity distribution networks are required to acquire the electricity produced by installations using renewable energy.

Ideally tilt fixed solar panels 16? North in Pirae, French Polynesia. To maximize your solar PV system's energy output in Pirae, French Polynesia (Lat/Long -17.5156, -149.5502) throughout the year, you should tilt your panels at an angle of 16? North for fixed panel installations.

La Direction des Imp?ts et des Contributions Publiques est le service public de l''administration polyn?sienne charg? d''assurer la gestion, le recouvrement et le contr?le des imp?ts, droits et taxes directs et indirects pr?vus au code des imp?ts et per?us au profit de la Polyn?sie ???
