

What is France Smart Grid project?

The France Smart Grid Project was completed using smart grid as the technology category. It is an advanced grid infrastructure, renewable integration, smart homes and smart cities project with a rated capacity of 500MWh. It is implemented in the islands.

Does French Polynesia rely on hydrocarbons?

French Polynesia, like most island territories, is highly dependent on hydrocarbon imports. In 2019, 93.8% of energy consumed in the archipelagos came from imports of various petroleum-based fuels. The renewable energy penetration rate in power generation stood at 28.78% in 2019. This figure has remained stable over the last five years.

What is French Polynesia's energy transition plan?

French Polynesia's energy transition plan has three main objectives: Change the energy model, by gradually replacing the use of fossil fuels with renewable energies in all activities

Who financed the Smart Grid project?

It is implemented in the islands. The smart grid project is owned by Electricite de France and developed by DELTA DORE, Saft Groupe, Schneider Electric France and Tenesol. Approximately \$35.06m was financed by the authorities for the development of the project.

What is a smart grid project?

It is an advanced grid infrastructure, renewable integration, smart homes and smart cities project with a rated capacity of 500MWh. It is implemented in the islands. The smart grid project is owned by Electricite de France and developed by DELTA DORE, Saft Groupe, Schneider Electric France and Tenesol.

Are smart grid technologies essential?

While smart grid technologies are essential if we are to succeed in (...) During a press conference this morning, Xavier Pintat, president of (...) On June 21, Xavier Piechaczyk, chairman of RTE's board of (...) The final report of the IElectrix project took place on Thursday 23 (...)
