Development on the Latitude 53 project began a few years ago as a new geothermal energy extraction operation coming to Hinton. It is now preparing to combine that into a vertical farm now that Alberta Energy gave Novus Earth Energy Operations the go-ahead with approval with subsurface geothermal rights.

The law on energy transition for a green growth, as the bill is called, also targets to halve the country's overall energy consumption by 2050, decrease the share of nuclear energy in the energy mix to 50% by 2025 and lower the share of fossil fuels by 30% by 2030. Progress will be measured against the 2012 levels.

Release date: 2023-05-31. Geothermal energy has a small environmental footprint and is one of the few renewable energy sources that is always available, has low greenhouse gas (GHG) emissions, can operate at high capacity factors, Definition * and requires minimal land and fresh water. Footnote 1 However, resource exploration risk and capital costs for geothermal plants ???
