

Where is the solar power plant in Cagayan de Oro?

The CEPALCO has now getting the attention of my environment advocates as they introduce the Solar Power Plant in Cagayan de Oro, Philippines. The solar power plant has 6,500 solar panels and set on a 2 hectares of land in Barangay Indahag, Cagayan de Oro City.

Why is Cagayan de Oro a good place to install solar power?

Cagayan de Oro, Philippines, is a favorable location for solar power generation due to its consistent sunlight throughout the year. The average daily energy production per kW of installed solar in this area is 5.88 kWh during summer, 5.38 kWh in autumn, 4.59 kWh in winter, and 6.02 kWh in spring.

Will CEPALCO expand the country's first solar farm in Cagayan de Oro City?

Cepalco plans to expand the country's first solar farm in Cagayan de Oro City to help ease the power crunch in Mindanao which will be located at Villanueva, Misamis Oriental and in partnership with Kirahon Solar Energy Corp. According to Jose Maria A. Abaya, Cepalco director, "We're planning to expand it sa 10 MW.

When is the best time for solar power generation in Cagayan de Oro?

In Cagayan de Oro, the most efficient solar power generation occurs during summer and spring months because it lies within the tropics where seasons are typically defined by wet and dry periods rather than temperature fluctuations.

What is the topography of Cagayan de Oro?

The topography around Cagayan de Oro, Philippines is mostly mountainous. The area is located in the Agusan Valley and has an elevation of about 500 meters above sea level. Areas that are most suitable for large-scale solar PV would be flat or gently sloping areas with unobstructed access to sunlight, such as agricultural land or open fields.
