Each site is expected to generate 3,914,190 kilowatt-hours (kWh) per year, totaling 449,825,143 kWh over 20 years, which is capable of powering more than 2,000 average Colorado

Although solar screens may look dark from the outside, the outward visibility can still be excellent. In some cases the outward visibility is even improved as the solar screens reduce the sun's glare and many people forget they are even on the windows. Solar screens come in 80% or 90% heat blockage and come in a variety of colors.

Photos | Reviews | 242 building permits for
\$3,838,500. 2 reviews: "Absolutely horrible service.
It is now March of 2024, SEVEN MONTHS LATER,
and they still have not worked with the energy
company to get the solar panels inspected and
actually working. So I just have dead weight sitting
on top

Solar panels cost between \$8,500 and \$30,500 or
about \$12,700 on average. The price you'll pay
depends on the number of solar panels and your
location. but this number can range from 15 to 34
