EU stands for Energy Unit and is the unit of energy used by IndustrialCraft2. It is similar to the SI unit of the Joule. EU can be created through various IC2 generators. EU can be stored in various blocks and items including BatBox, Energy Crystal, BatPack, and many more. EU can be transported through cables to power various IC2 machines. EU/t means Energy Units per Tick. ???

FTB Revelation (without the s :D) has Actually Additions in the pack, so don''t forget one of the best early game storages in the game: the Small Storage Crate, no need for Diamond Chests. If you want some early game 3x3 mining, make a tinkers hammer with 2 cobblestone Large Plates, a cobblestone Hammer Head and a wooden Tough Tool Rod.

Redstone Flux (RF) is a form of energy that was originally implemented by Thermal Expansion 3, replacing the previously used Minecraft Joules and thereby removing the dependency on BuildCraft. RF acts as a highly simplified form of electricity that is designed to be easy to use and low on server impact. Introduced in CoFH Core and later made available as a separate mod, ???

Hi, so im looking for energy storage on ATM9 but i couldn"t find anything better than capacitor banks. I added Mekanism and immersive engineering (both of those were compiled from latest source by myself) but still can"t find anything for this purpose. Last modpack i played was FTB Revelation on 1.12.2 so don"t blame me if im dumb

The redstone energy cell is used to store Buildcraft 3 MJ power in the same way as a BatBox stores IndustrialCraft EU power. The unit can store up to 600,000 MJ. Any side of the block can be either an input or an output. Furthermore, the amount of MJ/t the cell can send and receive is fully programmable with a simple interface. Pressing the "+" or the "-" changes the max input ???

A coal generator is in no way enough to power a builder, not even close, you''ll have to seriously upgrade your power production. A builder needs more then 20K RF/t to run constantly and a coal generator generates 20-80 RF/t (depanding on the type of coal generator) so do the math.

Once you have set up an apiary with an energy bee, put some kind of energy storage block right next to it (the energy cell from Thermal Expansion works great) and you"re good to go. I managed to get around 15000 rf/t from just one apiary with my bees but there's still room for improvement. I posted a gallery of my setup some days ago.
