Tyco Electronics Power Systems (Mesquite, TX)
announced a new Galaxy Power System, the
GPS4812, which is suitable for use in -48Vdc
applications. The GPS4812 provides power ranging
from 100A to 400A in a half-height cabinet for
mounting on top of VRLA batteries, up to 800A in a
full-height single cabinet, or up to 1,200A in a
dual-cabinet arrangement.

GALAXY Millennium??? II Controller Data Sheet
January 2008 GALAXY MILLENNIUM II is Lineage Power's flagship controller designed to meet the needs of telecom power systems in the 21st century. Building on the industry leading GALAXY MILLENNIUM controller, the GALAXY MILLENNIUM II combines sophisticated control,

The updated GALAXY Switchmode Rectifier 595 Series provides highest quality dc power for telecommunications and data processing systems and their batteries. Integrates the latest switchmode technology with superior power, protection, and control features in a compact, cost-efficient power conversion system.

Galaxy Pulsar* Plus Controller The Galaxy Pulsar Plus is used throughout many of the GE DC Power products including Infinity, CP, and SPS CP, and other power systems. These controllers monitor and control system components including rectifiers, converters, and distribution modules via a multi-drop RS485 digital communications bus. System

"GALAXY POWER" is providing bunker services to river vessels with gasoil (10ppm sulphur content) and lubricants in Bulgarian Danube ports. Bunkering services have been developed by "COSMOS SHIPPING" since July 1996, starting in the port of SOMOVIT (km.608 Danube).. The broadening of this service is made step by step and is in direct interrelation with the stages of ???

Lineage Power Galaxy Manager??? software is the centralized visibility and control component of a comprehensive power management system
CPS6000 is a -48Vdc power system that is based upon a 2U high (3.50 in./ 89 mm) shelf with 19" and 23" wide mounting options.

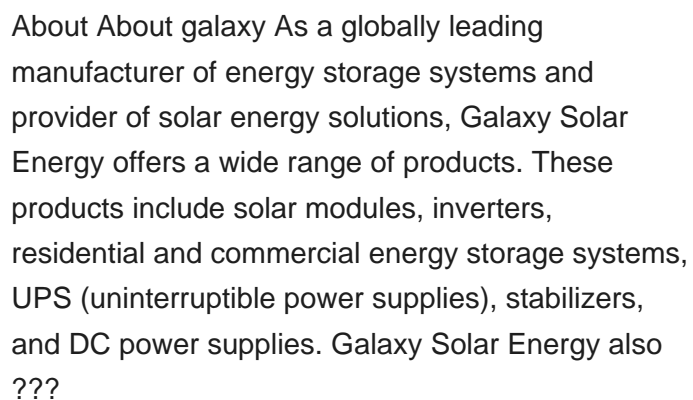

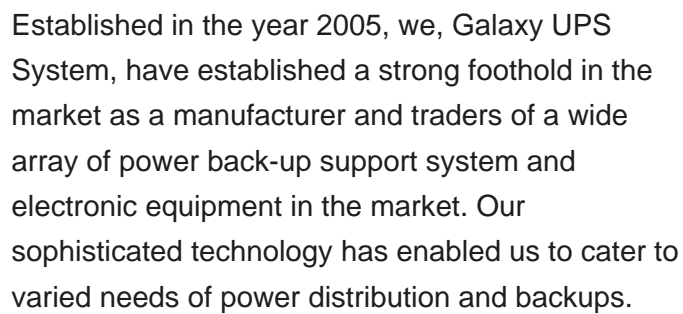

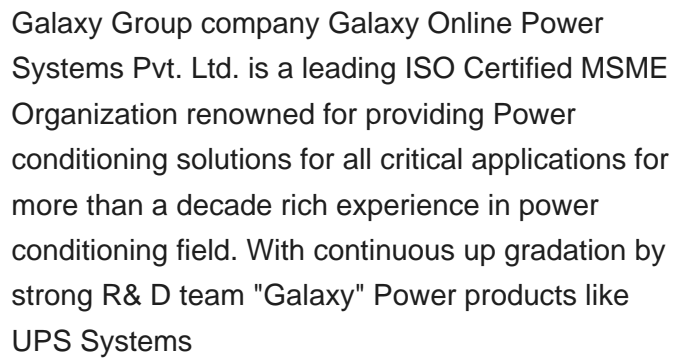

technology with superior power, protection, and control features in a compact, cost-efficient power-conversion system. Designed as a key element in the OmniOn Power GALAXY Power System 4848/100 Battery Plant, the 595LT Series Rectifier converts ac input voltage into the dc voltage level required to power end-user equipment.

The industry standard for DC energy systems, the GPS 4812/24 (Galaxy Power System) is the first choice to meet DC power requirements of medium datacenter and central office applications. The GPS provides output capacities up to 6,400A in an integrated, multi-cabinet configuration; 1,600A in a full height single cabinet; or 800A in a half height

Galaxy Power System-48V DC Large Power Plant H569-434 ??? Telecom central office, IS data centers and MTSO applications ??? Streamlined system control and monitoring ??? 20,000 Amp capacity ??? Rectifier efficiencies approaching 96% The industry standard for telecom power, the GPS4848/100 is the first choice to meet dc power

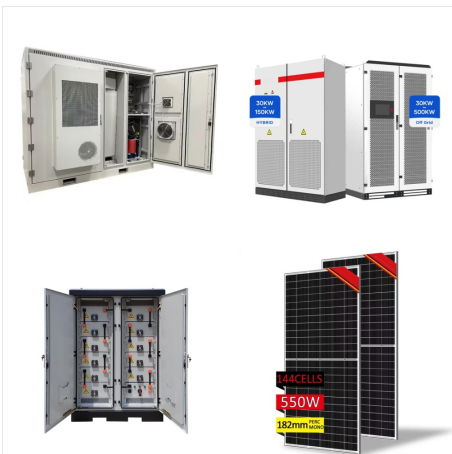

??? The Galaxy Power System is Underwriters Laboratories (UL) Listed per Subject Letter 1801, DC Power Distribution Centers for Telecommunications Equipment, and VDE Licensed to EN60950 (H569-436 and H569-437 only). Rectifiers are individually UL Recognized and/or CSA Certified to UL1950 and CSA C22.2 No. 234/950. Rectifiers are also approved

Galaxy Group company Galaxy Online Power Systems Pvt. Ltd. is a leading ISO Certified MSME Organization renowned for providing Power conditioning solutions for all critical applications for more than a decade rich experience in power conditioning field. With continuous up gradation by strong R& D team "Galaxy" Power products like UPS Systems
