

Which generator is best for a small home?

Best for Small Homes Briggs & Stratton PowerProtect Standby Generator [Read more](#) Best for Warm Climates Generac Protector Qs Standby Generator [Read more](#) Best Value Generac Powerpack Standby Generator [Read more](#) The Expert: Bradley Ford has spent most of his life around tools--fixing, building, and making things.

How much power does a gas generator produce?

It has a power output of 13,000 watts via liquid propane and 11,500 watts via natural gas. That's less power than a larger unit, but this generator will still allow you to power your home.

Can a whole house generator use natural gas?

Whole house generators either use liquid propane from a tank or natural gas from a utility line (or custom tank). Propane is cheaper and less contaminating, but using natural gas means you won't have to refill a tank (although this isn't an option if you're looking to go off the grid).

Should you buy a generator for a small home?

But depending on the heating and cooling systems, it can supply power to most of a smaller one. This generator is a great option if you want a power backup for a few necessities. Sure, it's still an investment, but it comes with a five-year warranty that covers parts, labor, and travel.

Why should you buy a home generator?

Generators ensure that you'll be able to use your lights and appliances during a power outage. Depending on the type and size you get, a generator can also keep your heat and well pump running, which is crucial during the cold winter months. When shopping for a home generator, there are two types to choose from.

Can a generator run on gas?

Some generators can run on liquid propane or natural gas. Portable generators often run on gasoline, though there are others on the market that run on diesel fuel. Are there any safety considerations when installing a home generator?
