

The PWRcell system is not just a powerful battery, but is also the most flexible and scalable home energy system on the market. With a standard Outdoor Rated (OR) battery cabinet, the PWRcell is compatible with most installs in nearly any climate.

Thank you for purchasing a Generac PWRcell(R) product. The Generac PWRcell Inverter is a storage-ready inverter that connects to the PV Link??? optimizers and PWRcell Batteries to form the Generac PWRcell system. This manual provides instructions for installing the PWRcell Inverter, including mounting, wiring, and battery

Every PWRcell system is comprised of components that work together to generate and store power. This includes the solar panels, PWRcell inverter, REbus communication system, and automatic transfer switch. Components will vary depending on the system configuration.

Level-Up your solar power with storage. Including a battery storage solution with solar panels will allow you to offset your carbon footprint and utility bills, self-supply your backup power, and more. See how storage expands the benefits of solar.

Generac PWRcell??? 7.6 kW 120/240V Single Phase Inverter; The industry's most feature-rich line of inverters; Bi-Directional, REbus??? Powered Design; A simple, efficient design for integrating smart batteries with solar; 7,600-Watt (Grid-Tie) & 8,000-Watt (Backup) Rated Watts; Provides up to 10,000 starting watts during backup operation

Generac, a U.S. manufacturer of backup power generation products for the residential, light commercial and industrial markets, has unveiled two new solar microinverter models for residential PV
