Enclosure for a Generator This enclosure is a permanent structure to house a standard generator used to run fridges, freezers, and the air conditioner when the power goes out. To protect it from the weather, keep it secure from theft, and reduce noise, it was built on a concrete pad with walls made of concrete blocks.

Often the battery charger notices that the battery is not retaining its charge, and puts more power into the battery, which can explode. When a battery explodes, it sprays battery acid inside the generator cabinet. This acid can eat away at sensitive winding inside the generator, which will now cost thousands of dollars to repair.

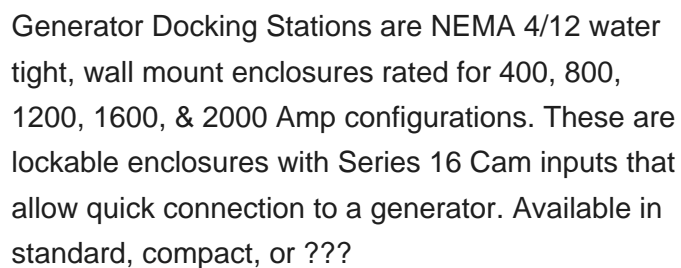

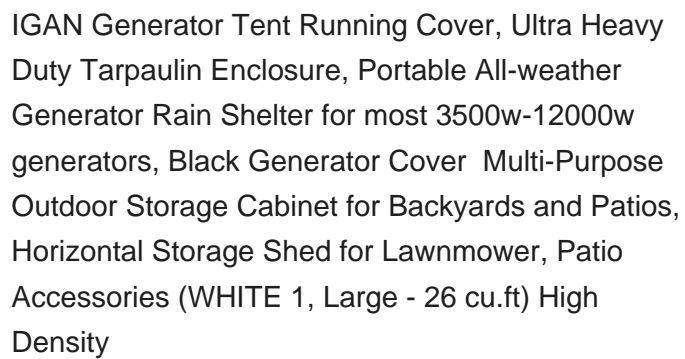

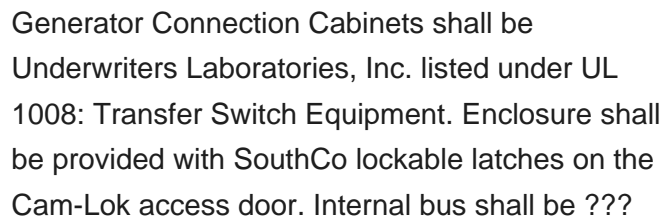

The virtual kitchen remodel planner helps you see how the cabinets, paint colors, backsplash, countertops, flooring and design elements you're considering will come together in your finished space. It's an easy, risk-free way to experiment or sign off on your choices.
