

Does Georgia Power offer solar?

From home installation and our buy back program, to non-installation options, our goal is to make solar an option for every Georgia Power customer. Learn more about our behind-the-meter solar programs, including the new Renewable and Nonrenewable Resources (RNR) program, and how to interconnect your system.

How can I support the development of solar power in Georgia?

Sign up now and get the opportunity to support the development of solar power in Georgia by subscribing to a portion of local solar farms. Every month you'll receive energy credits on your monthly bill based on the solar farm's production. Want to become a corporate sponsor? Help make renewable energy available to income-qualified customers.

Does Georgia have a solar incentive program?

Unlike many states that give residents money or tax credits to offset the cost of solar, Georgia does not have any statewide incentive programs of this type. It's best to look to programs run by local communities or utility companies for financial help.

Does Georgia Power Company offer a solar extension program?

The Public Service Commission Order pertaining to Dockets 4822, 16573, and 19279 states that Georgia Power Company is to provide existing solar participants the option to extend the term of their current Distributed or Utility Scale generation for up to 35 years. Please select from the following options for more information surrounding your program.

Do Georgia Utility companies offer solar rebates?

There are a number of other rebate programs offered by Georgia utility companies that can help you afford electric appliances that would make sense to pair with a solar system. Sawnee EMC gives its customers rebates for projects including insulation, electric water heaters and heat pumps.

Should you put solar panels on your roof in Georgia?

With an average of 110 sunny days a year in the state, many homeowners could save money by throwing panels on their roof, decreasing their reliance on the electric grid. Georgia isn't the most generous state when

it comes to incentivizing solar installations, but look closer, because there's good news for residents who want to install solar panels.

On Thursday, Commissioner Tim Echols asked how the 5,000 customers participating in the behind-the-meter solar program might benefit the rest of Georgia Power's customers. Echols proposed a motion in 2019 that led to Georgia Power expanding the rooftop solar program to 5,000 customers, which costs relatively little to subsidize.

Effective January 2017, Georgia Power's Green Energy program ended and the Simple Solar Program began. The Simple Solar Program enables customers to support and foster the growth of solar energy in Georgia by Georgia Power purchasing and retiring Renewable Energy Credits (RECs) generated from solar energy resources on the customer's behalf.

Georgia Power is nearing its limit on residential solar panels. Environmental groups want to expand the program. The Georgia Public Service Commission is expected to discuss a key change to Georgia Power's rooftop solar program Thursday. Since 2019, Georgia Power customers with rooftop solar panels have been able to use 100% of the energy

Solar energy is a renewable and emissions-free energy source that can be an excellent option for some homes and businesses. With an average break-even period for residential installations between 12 and 15 years (this varies for commercial locations), solar should be considered a long-term investment in sustainability.

This program allows you, a Georgia Power customer, to partner with any solar developer to build a solar facility on or adjacent to your property. Georgia Power will purchase 100% of the energy generated and retire the Renewable Energy Credits (RECs) associated with the solar facility on your behalf, allowing you to claim the renewable benefits

Georgia Power has consistently signaled it prefers utility scale solar energy production, as in this solar farm in Bibb County, over dispersed rooftop solar installations. A program that helped make rooftop solar affordable for the utility's customers reached its 5,000-customer cap in summer 2021, making solar power more expensive for the end

# GEORGIA POWER RESIDENTIAL SOLAR PROGRAM

The Georgia Solar Power Program. In Georgia specifically, using solar energy is possible. However, because it isn't quite as common in the state, fewer local incentives exist to make the switch. Georgia Power Residential Solar Program. To further incentivize the adoption of solar energy, Georgia Power keeps homeowners informed about

On Thursday, Commissioner Tim Echols asked how the 5,000 customers participating in the behind-the-meter solar program might benefit the rest of Georgia Power's customers. Echols proposed a motion in 2019 that led to Georgia Power expanding the rooftop solar program to 5,000 customers, which costs relatively little to subsidize.

The best solar incentive in Georgia is actually a federal tax credit. Residential Clean Energy Credit. The Residential Clean Energy Credit, formerly known as the federal investment tax credit (ITC), can reduce your solar panel system's cost by 30%. Your entire system, including all the equipment, labor, permitting, and sales tax, qualifies for the ITC.
