

Could energy storage batteries prevent future power cuts in Gibraltar?

PLANS to set up energy storage batteries at the North Mole Power Station could prevent future power cuts in Gibraltar. The ten new prefabricated

Does Gibraltar have electricity?

Until recently, Gibraltar's electricity supply was dependent on some 40 diesel-powered engines and turbines distributed across Gibraltar. In 2019 a new, modern power station situated at the North Mole commenced operation running long term on liquid natural gas (LNG).

Why does Gibraltar need a new power plant?

This secures Gibraltar's energy supply economically, environmentally and sustainably. The associated closure of the three old plants represents the largest measure taken to improve air quality and reduce greenhouse gas emissions. The new power plant consists of six engines; 3 of which run on natural gas and 3 of which are dual fuel.

How many power stations are there in Gibraltar?

There are currently three installations in Gibraltar producing energy. Two of these installations namely Waterport and OESCO power stations supply electricity to the civil population,...

Is Gibraltar a sustainable country?

At present, Gibraltar is very dependent on the importation of fossil fuels for energy production and in order to reach the 2020 targets, strategies and measures based on sustainability, improved efficiency and security need to be implemented. Guidance documents are also available to aid in the implementation of Articles within the EED.

What does LNG stand for in Gibraltar?

In 2019 a new, modern power station situated at the North Mole commenced operation running long term on liquid natural gas (LNG). This secures Gibraltar's energy supply economically, environmentally and sustainably.

Therefore, Gibraltar's future safety and security hinges on the GSLP Liberals' proven leadership, experience and dedication to continue to navigate the complex treaty negotiations. As Gibraltar defines its future, we are the only experienced safe pair of hands capable of safeguarding our interests. Let us finish what we started.

Gibraltar took another step toward switching to liquefied natural gas for its electricity needs yesterday, as a new terminal that will feed a gas-fuelled power plant was officially opened.
