

What is a gigawatt (GW)?

A gigawatt (GW) is 1000 MW. The projects are mainly concentrated in NSW and South Australia, but Queensland is catching up with one of the first power projects combining solar and wind generation with battery storage on the drawing boards. Major retailers are also stepping up, with AGL and Origin Energy also proposing big battery projects.

Who is gigawatt?

It's safe to say that GigaWatt's story is truly a tale of success. GigaWatt was founded by Adam Schubert in 2007, but his audio adventure started almost a decade earlier, in 1998. Back then he co-founded Power Audio Laboratories and held the position of the main designer in this company.

Who owns gigawatt power?

A wholly-owned subsidiary of publicly listed Vivant Corp., Vivant will obtain shares of Gigawatt Power, which owns 50 percent in Delta P Inc., Calamian Islands Power Corp. (CIPC), La Pampanga Energy Corp. (LPEC), Culna Renewable Energy Corp. (CREC), as well as 35 percent in Isla Norte Power Corp. (Isla Norte).
