

What is GlassPoint Solar Technology?

GlassPoint's solar technology is designed to generate steam using the sun's energy for industrial processes. It seamlessly integrates into existing operations.

Will GlassPoint supply Saudis with solar parts?

GlassPoint's new regional manufacturing facility will supply both the Saudis and nearby countries with solar parts.

Does GlassPoint use solar steam?

GlassPoint customers typically retain their existing fossil fuel based sources of steam, but operate them at less than full capacity, reducing the amount of fuel used and the amount of CO2 emitted. Solar steam is added to ensure constant steam flow to the process.

Will GlassPoint be liquidated?

It was announced that GlassPoint was to be liquidated in May 2020, the company citing low and unpredictable oil and gas prices for the decision.

Who is David & what does he do at GlassPoint?

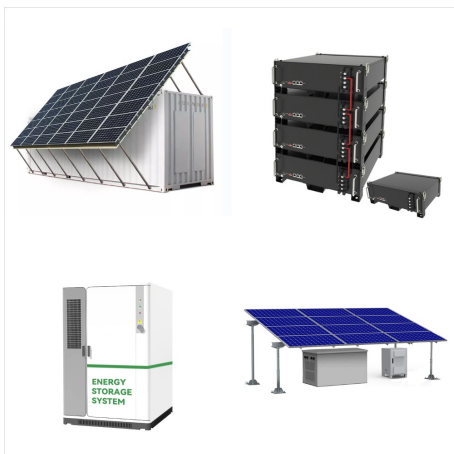

David leads the operations, manufacturing, supply chain, project development and deployment activities within GlassPoint. With more than 25 years background in engineering, he opened and led multiple engineering and manufacturing centers of excellence across Europe, China, USA and Middle East.

Bloom Energy (NYSE:BE) and its local partner SK Engineering & Construction Co Ltd (SK E&C) have successfully deployed in South Korea 100 kW of solid-oxide fuel cells (SOFC) that are powered solely by hydrogen.

Mingyang announced the news in a social media post on Thursday, saying that the venture will support South Korea's wind power industry. The partners aim to provide products and services to South Korea and the surrounding region. The move follows the signing of a localisation cooperation agreement between the companies in May 2023.

South Korea's strategic positioning as an intermediary between Western alliances and BRICS nations presents an opportunity to shape regional and global dialogues, ensuring that its voice remains influential amidst shifting power structures. By focusing on strategic, economic, and technological collaboration with India and engaging with the
