The Global Solar Atlas provides a summary of solar power potential and solar resources globally. It is provided by the World Bank Group as a free service to governments, developers and the general public, and allows users to quickly obtain data and carry out a simple electricity output calculation for any location covered by the solar resource database.

Global Energy Monitor studies the evolving international energy landscape, creating databases, reports, and interactive tools that enhance understanding. Our work transforms complexity into clarity, enhancing the quality of public discourse on energy and the environment.

Global Solar Energy is a US-based manufacturer of CIGS solar cells, a thin-film based photovoltaic technology, with manufacturing operations in Tucson, Arizona, United States, and Berlin, Germany. In 2013, it was bought by Chinese renewable energy company Hanergy. [1] ???

"Astronergy Solar Turkey 3" is operated by Astronergy Solar Turkey Enerji A.???. The project is reducing national energy deficit and development of local industries as it allows the use of local sources for energy generation to meet the increasing demands. The project is a bundled project consisting of 8 individual solar power plants under 1 MW.

Zorlu Enerji, which is a subsidiary of Zorlu Enerji companies and the only publicly open company operates on various fields of the sector with an integrated corporate combination including electricity and steam generation and their retail, electricity sales, electricity distribution, solar panel sales and installation, natural gas sales and

Global solar PV investments in capacity additions increased by over 20% in 2022 and surpassed USD 320 billion, marking another record year. Solar PV comprised almost 45% of total global electricity generation investment in 2022, triple the spending on all fossil fuel technologies collectively. Investment in PV is expected to grow further in the
