The Go Power's Cable Entry Plate on your RV's roof means you can install a solar panel up to 50% faster.

Can a solar panel be installed on an RV roof?

The Go Power's Cable Entry Plate on your RV's roof means you can install a solar panel up to 50% faster. Why Add Solar? Go Anywhere! Keep your batteries charged, without plugging into a power source. Harness the power of the sun to charge your batteries. With solar you don't have to pay to plug in at camp sites.

How does your RV Solar System work?

Solar takes the sun's energy and converts it into DC battery power to charge your RV batteries. It is a battery charger that works anytime the sun is out. But how do these components work together to power your RV's components? Read on to learn more. HOW IS YOUR RV SOLAR SYSTEM LIKE THE FUEL SYSTEM IN YOUR CAR?

How much power does an RV solar panel provide?

The 190-watt solar panel provides DC power to charge your RV's batteries, and the 1,500-watt inverter provides AC power to run appliances and electronics. This portable solar charging system lets you place the solar panel where you need it for maximum sunlight.

Should I buy a solar system for my RV?

A well-balanced solar setup is key to maximizing energy efficiency and ensuring that your system is matched to your RVing lifestyle. If you mostly camp in campgrounds, a small solar setup will do. However, if you enjoy boondocking in remote locations, you may want to invest in a more robust system. Photo courtesy of Go Power!

Why should you go solar for your RV?

RV Solar Power Solutions. Unplug and go off-grid. WHY GO SOLAR? Freedom to explore remote, off-grid locations. Spend less on fuel for generators. Enjoy the peace and quiet of the great outdoors. Go green, and put the sun to work for you. and stay up-to-date on trade-shows and events.

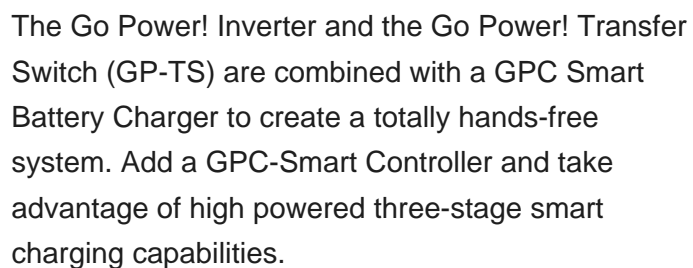

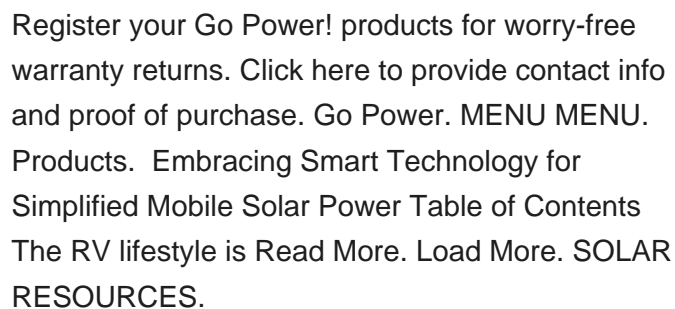

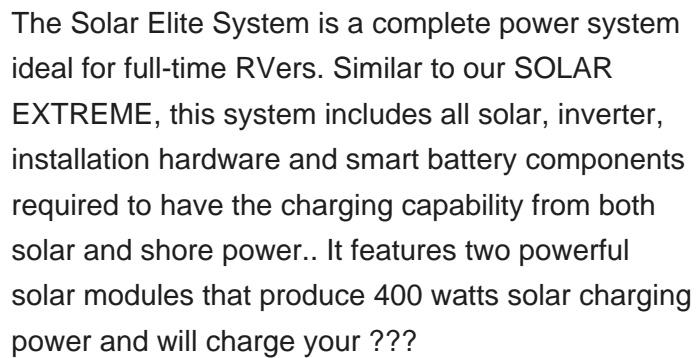

An inverter in your RV converts your DC battery power into AC for AC-powered devices such as TVs, hair dryers or coffee makers. Learn more . Can I run my TV, refrigerator, or water pump on solar? Yes. Many RV refrigerators can run on DC or AC power. You can also use solar to power your water pump. Most TVs run on AC power, requiring an inverter.
