

How much does a solar system cost in Greece?

The average cost of a solar system in Greece is EUR3 per watt. To account for the typical energy usage of the average home in Greece, most homeowners require a 4.2-kilowatt system. Using the per-watt figure above, a solar installation costs about EUR8,600, or EUR6,450 after the federal solar tax credit of 25% is applied.

Why are solar panels so expensive in Greece?

Global demand, industrial accidents, environmental disasters, exchange rates and the impact of the coronavirus pandemic could all be contributing to a rapid rise in the cost of solar power panels in Greece since the beginning of July. Industry sources reported price hikes of up to 25%.

Why are investors worried about solar power in Greece?

Investors in solar power in Greece are concerned because of a sharp rise in prices for the equipment in the past two months, reversing the declining trend in the cost of photovoltaic technology registered over the past years, according to a local media report. Developers told Energy Press the jump ranged from 10% to 25%.

Why are solar prices rising in Greece?

Industry sources reported price hikes of up to 25%. Investors in solar power in Greece are concerned because of a sharp rise in prices for the equipment in the past two months, reversing the declining trend in the cost of photovoltaic technology registered over the past years, according to a local media report.

Where do European solar panels come from?

European firms source almost all solar power panels from China. Respondents in a survey also said suppliers are only scheduling deliveries in the long run as stockpiles are empty. Earlier, it was investors who used to delay purchases, counting on a decrease in prices.
