

Who are puredrive energy?

When it comes to solar storage technology, Puredrive Energy is one of the leading names in the industry. They use their 10 years of experience to design, develop and build the very latest in innovative energy storage systems and distribute them out to customers in the UK and abroad.

How good is puredrive electrical service?

Replacement units have been provided under warranty, and fitted by Puredrive staff in a very timely manner. Technical support provided by Jack to our local installer Cavin at Doyle Electrical Services has also been first class. Excellent service from all concerned.

Does puredrive support a faulty battery?

Great support for a battery issue. After a bit of toing and froing with updates to the inverter and battery firmware, eventually one of the battery packs was identified as faulty. Puredrive support organised a replacement battery to be shipped next day and use the packaging to return the defective battery. All organised by puredrive.

Why should I install a puredrive home battery system?

By installing a Puredrive home battery system, you will be drawing power from the grid at the cheapest rates (don't worry our smart app will do that all for you), and with a full system install you can also sell your excess green power back to the grid.

What happened to puredrive & Duracell?

Puredrive has recently merged with Duracell, and we required new marketing material. It was a pleasure speaking to Jack, who got everything organised efficiently, 5* service. Date of experience: May 17, 2024 One of my five DC2 batteries died (the green LED wasn't lighting) after 14 months of use so Pavel was sent to check it out.

Can a puredrive battery & EV car charger work together?

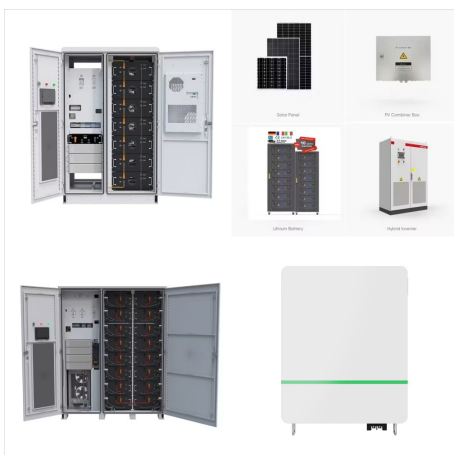

We took the recommendation from the installer and went for a Puredrive battery and EV car charger (it works in unison with the Inverter and Solar and can charge with excess solar only. So far - no issues with the battery. However the charger did have some issues, but these have now been resolved.

Puredrive Energy develops photovoltaic energy storage systems. Offered system stores excess photovoltaic energy generated during the day-time. Uses lithium iron phosphate batteries and features include 4.8kW storage capacity, 6k charging cycles, and 5-10 years warranty.

Puredrive Energy can call upon over 10 years of experience in the development, deployment and placement of battery technologies. With extensive experience in lead acid batteries through to the latest Lithium Ion batteries, Puredrive Energy is at the ???

Puredrive Energy offers development and distributes products for a broad spectrum. They serve marine, leisure, sports, mobility, UPS, and industrial markets in conjunction with energy storage systems that are aimed at the residential, commercial, and community battery storage markets.

Puredrive Energy is a company that focuses on the development and distribution of energy storage systems, operating within the energy sector. The company offers products such as home and commercial batteries and electric vehicle chargers, which are designed to store and manage energy for various uses, including charging electric vehicles and
