

Does Greece have a plan for rooftop solar PV?

November 2023, Greece submitted its NECP with more ambitious and updated targets for renewables and solar: 23.5 GW for all forms of renewables, from which 13.4 GW came from solar power capacity. However, there is no roadmap or strategy at this time in regards to rooftop solar PV in particular.

Will Greek government subsidise rooftop solar?

Rooftop solar array. Featured Image: Ralf Gosch/Shutterstock.com The Greek government has officially fired the starting gun of a EUR-238-million (USD 261.8m) programme that will subsidise the installation of rooftop solar systems coupled with battery storage.

How much will a rooftop photovoltaic subsidy program cost Greece?

Two more rooftop PV subsidy programs are expected, one for businesses and one for industries, with total funds for the sector expected to surpass EUR 700 million and potentially reach EUR 1 billion. The Greek Ministry of Environment and Energy issued a public call for its EUR 238 million subsidy program for rooftop photovoltaics.

What impedes solar development in Greece?

Currently, probably the main reason that impedes solar development and that makes administrative procedures long and burdensome in Greece, including rooftop solar, is grid availability. In many areas, applications for solar rooftop PV are being rejected due to lack of electricity grid capacity.

What is photovoltaic on the roof?

The online platform where citizens and farmers can submit applications for subsidy via the state program "Photovoltaic on the Roof" opened at 2 ' o clock Tuesday afternoon, May 2, 2023. The program enables thousands of households and farmers to generate the electricity they need and save money, the energy ministry said.

When did solar power start in Greece?

Broad development of solar power in Greece started in the 2000s, with installations of photovoltaic systems skyrocketing from 2009 because of the appealing feed-in tariffs introduced and the corresponding regulations for domestic applications of rooftop solar PV.
