

What is green energy Oman (Geo)?

GEO project is coastal, so transport vessels can be easily filled at ports or via small footprint offshore loading towers. Green Energy Oman (GEO) is one of the most promising clean fuels hubs in the world with the potential to be a leading project in this sector, supplying the globe with green fuels in a decarbonized economy.

What is Oman's green fuels project?

It is a 25 GW wind and solar green fuels facility sited in the southern region of Oman in Al Wusta and Dhofar governorates where it will utilize Oman's natural resources of wind and sun to turn seawater into green fuels: hydrogen, ammonia, methanol, and synthetic fuels.

Who is Vulcan green energy?

Vulcan Green Energy (VGE) is part of Oman's leading investor group with demonstrated commitment to His Majesty's vision. VGE is established as a developer and operator for innovative clean energy assets to spearhead the energy transition by deploying its flagship project configuration - the Integrated Energy Valley (IEV) in Oman.

What makes green energy unique?

Green Energy's unique coastal desert sites are both very sunny during the day, and very windy at night. This means low cost clean energy 24/7, allowing the projects to run processing equipment day and night, maximizing their usage.

OQ Alternative Energy and Tree Energy Solutions (TES), a Europe-based global green energy company, have also entered into a joint study agreement to assess the development of an electric natural gas (e-NG) facility in Oman. The agreement was signed by Najla al Jamali and Marco Alver?, CEO and Co-Founder of TES.
