At this moment, Green Solar International is actively developing several so called solar-to-green-hydrogen projects (PV-to-GH2) in Spain. Combining large-scale ground-mounted photovoltaic projects with electrolyzers aimed at producing green hydrogen and/or green ammonia should still be considered as a pioneering venture.

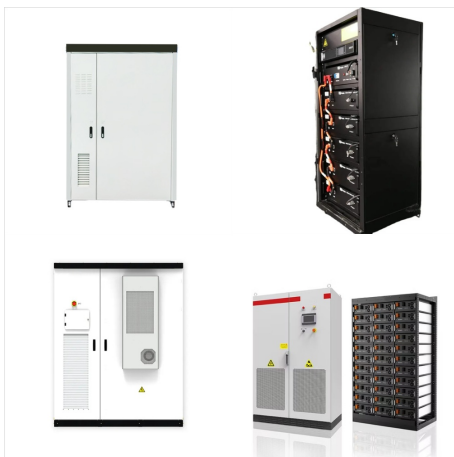

Accreditation Made in Germany International Accreditation by the German Solar Energy Society DGS GREEN Solar Academy follows the values and quality standards of the DGS, Germany's most reputable solar grassroots association ???

Green Solar International and green hydrogen. At present, Green Solar International is actively developing several Green Hydrogen projects in Spain. We aim to combine large-scale ground-mounted renewable energy projects with electrolysis to produce green hydrogen and/or green ammonia, which we believe is a pioneering venture.

A green hydrogen project requires the water necessary for the electrolysis process to be carefully chosen. The quality and origin of the water not only influence the efficiency of hydrogen production but also have a significant impact on environmental sustainability. Therefore, it is essential to conduct a thorough evaluation of various water sources to ensure that natural ???
