The WME04 enclosure is a wall mounted  
interconnect point for optical fiber link distribution  
and connectivity. The enclosure holds up to four  
LGX adapter plates or modules to provide up to 48  
fiber connection points in tradition patch and splice  
applications. When using field terminations or MPO  
based components, the density can expand to 96  
connection points (LC connectors only).

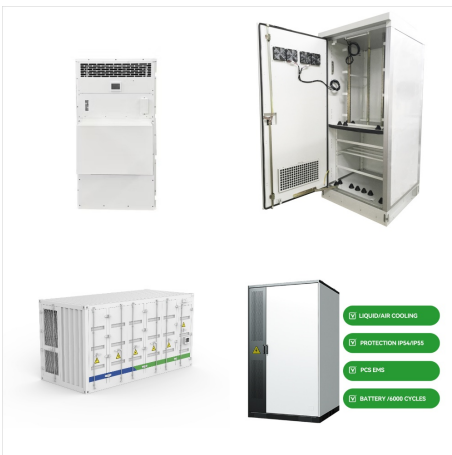

Feature: Cylinder locks for mild steel wall mounted  
enclosures. Advantage: The cylinder replaces the  
standard double-bit 3 mm insert in the enclosure's  
standard lock. Benefit: The cylinder limits the  
access to the enclosure via different key options.
