The IQ Power HL System provides high voltage output power and processes all system intelligence to maintain and communicate complete static control with the Control Station. These power units work with IQ Power HL Static Neutralizing Bars which are available in Speed and ???

As a result, the anti-static bars connected to the power unit produce positive and negative ions simultaneously. This ensures optimal neutralization of static charges even at very high velocities/speeds. This power unit is fitted with two high-voltage indicators and an on/off switch with an indication light.

Part Number: A2C7BHR. Item ID: 1223. If there are more than (1) quantity, do feel free to reach out to us for an actual image of each unit. Weight: 3.36 kg. More information We will review and approve your price match request on a case by case basis.

Active ionisation equipment operates on high voltage. The power units transform the mains voltage to the high voltage required by the ioniser. There are different types of power units available. Power units are easily connected and operated and don't need any maintenance. The standard model has a modern styling featuring easy-access control and
