The solar project, for which Sinohydro signed the engineering, procurement and construction (EPC) contract, involves three facilities. The first is a photovoltaic solar power plant to be built in Gardete, a town located 8km from the capital city, Bissau. The solar plant will sell power to the national utility EAGB under a long-term contract.

WASHINGTON, JUNE 6, 2024 - The World Bank's Board of Executive Directors approved a \$35 million grant to enable solar power generation and increase access to electricity in Guinea-Bissau.. The Guinea-Bissau Solar Energy Scale-up and Access Project will work on the development of solar energy generation and network enhancement, including the preparation ???

Rural Areas of Guinea Bissau are set to receive electricity through off-grid solar technologies through a project called the Regional Off-Grid Electricity Access Project (ROGEAP). ROGEAP will be implemented by the ???

The launch of large-scale solar power plants in Guinea-Bissau marks a significant milestone in the country's journey towards sustainable energy. With the support of international organizations and private partners, this project has the potential to bring about positive changes in the energy landscape of Guinea-Bissau.

Guinea's energy mix by 2025 will be dominated by hydropower, which would account for over 80 percent of the total installed capacity, should these planned investments be realized. Solar power is also growing in popularity for both corporate and residential use. There is currently no solar power plant connected to the national grid.
