 farm in Boeotia, with a ???

Beginning at the planning stage and extending over the complete operating life of our products, customer orientation is the pervasive feature of our wind energy projects. We provide tailor-made turbine configurations and product variants for every environment.

Fewer components, higher wind energy yield, reliable operation VENSYS Energy AG with its head office in Neunkirchen, Germany, develops and manufactures gearless wind turbines, whose high-performance capability using a permanently magnet-excited multi-polar generator is the trademark of our company. Other distinctive features are the

VENSYS technology is based on the idea of generating a maximum amount of energy while minimizing losses. Products Our robust turbines which have stood the test of time all over the world are the first choice not only in extreme climates and where infrastructure is poor.

Vensys Energy AG (stylized as VENSYS) is a German gearless wind turbine manufacturer which is majority-owned by Chinese turbine manufacturer Goldwind. [1] Vensys licenses its products to several non-European manufacturers of wind turbines. In addition, Vensys itself manufactures plants on a small scale at its headquarters in Neunkirchen

Vensys Energy is a leading manufacturer of wind turbines in the megawatt and multi-megawatt class. Engineering at our own head office in Germany provides the interface between continuous development and the quick implementation of its results for new VENSYS products, with development and production going hand in hand.

Beginning at the planning stage and extending over the complete operating life of our products, customer orientation is the pervasive feature of our wind energy projects. We provide tailor-made turbine configurations and product variants ???
