

Successful Hadron Energy Website Launch and Seed Round Announcement. Read the article. November 5, 2024. TechCrunch Disrupt in San Francisco. Read the article. October 24, 2024. Department of Energy Announces \$900 Million for Small Modular Reactors. Read the article. October 16, 2024.

Hadron Energy is a leading developer in the field of micro modular reactors, specializing in innovative nuclear energy solutions. As an expert in the energy market, the company focuses on creating advanced, carbon-free energy sources through the deployment of small modular reactors. Hadron Energy is at the forefront of this technology

Successful Hadron Energy Website Launch. On November 4th, 2024 the Hadron Energy team launched their flagship website to display part of their micro modular reactor design. This was a successful launch with nearly 2,000 views in the first 2 days creating great interest in the portable energy device.

Hadron Energy designs all aspects of battery and battery management systems across a broad range of industries. We have clients globally ranging from electric vehicles to power tools. We offer bespoke solutions for your requirements, offering a full design and implementation service.

At Hadron Energy, we're on a mission to redefine the world's energy landscape with cutting-edge micro reactor technology. If you're passionate about innovation, sustainability, and pushing the boundaries of what's possible, we want you on our team.

Hadron Energy specializes in Micro Nuclear Reactor (MNR) development, design, and research. Each unit produces 2 megawatts of electricity for a brighter, healthier, and more equitable future for all. Hadron Energy was founded by Samuel Gibson, a mechanical engineer who is deeply passionate about clean energy and in particular, the advancement of
