

Is Haiti a good place for solar power?

Haiti enjoys abundant sunlight throughout the year, making it an excellent candidate for solar power systems.

Can off-grid solar improve Haiti's energy access?

In parallel with other efforts like minigrid development and national grid planning, off-grid solar also has the potential to play an important role in advancing Haiti's energy access. As the name suggests, off-grid solar systems operate independently from the traditional electricity grid.

How can Haiti improve its energy system?

As an island nation with an evolving yet vulnerable power grid, Haiti must strategically integrate resilience into its energy system planning. Leveraging investments in renewables, distributed energy resources, and energy storage is key to improving the resiliency and security of Haiti's power system and electricity supply.

How many people in Haiti have electricity?

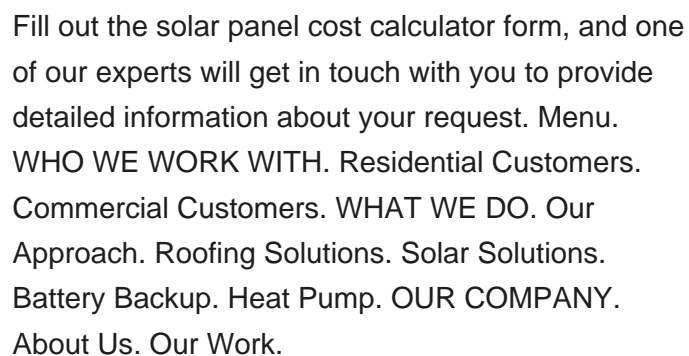

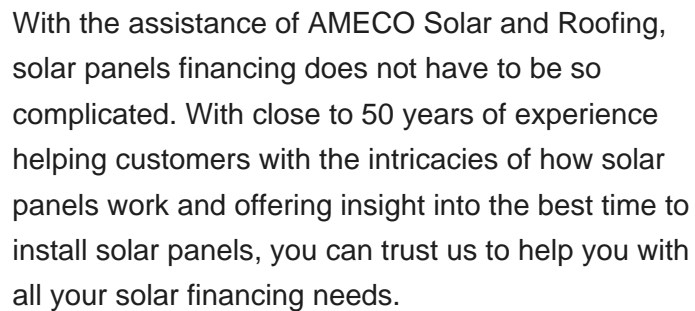

About 49% of the population of Haiti had access to electricity as of 2022. In rural areas, that number is closer to 2%, and while 80% of Haiti's urban areas have access to electricity, that access may not be reliable. "Even when a household is connected to the power grid, they might only have power for three to eight hours a day."

Will USAID and NREL reshape Haiti's energy landscape?

In a bid to reshape Haiti's energy landscape, USAID and NREL will support Haiti's ministries and government in formulating the country's Integrated Resource and Resilience plan, which is a comprehensive energy sector master plan that envisions a sustainable, secure, and resilient energy future for Haiti.

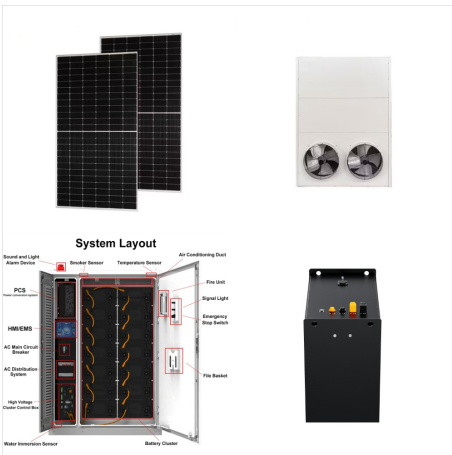

How is USAID partnering with NREL in Haiti?

USAID and NREL are partnering with Haitian stakeholders to boost workforce skills, build strong regulatory frameworks, and deploy advanced renewable energy technologies. Photo from Flickr About 49% of the population of Haiti had access to electricity as of 2022.
