HAITI CIC ENERGIGUNE GIGAFACTORIES

SOLAR[®]

As one can see, Europe has made the decision to have a relevant position in the world production of batteries for the automotive market, and the next few years will see an evolution in the European map of gigafactories.

Not in vain, the company currently has two operational gigafactories in the country (although one of them, the one in Buffalo, is not focused on batteries for the electromobility industry, but solar) and plans to open by the end of 2021 its macro gigafactory project in Texas.

We're excited to bring back our renowned maps showcasing #gigafactories in Europe and North America. These hubs of #innovation are driving the future of #energystorage and production!
