

A Harvest Power consultant will come by for an in-home solar energy evaluation. They will provide you with all the information you need to decide if switching to solar power is right for you and your home. We will also take a look at your utility bill and educate you on your possible savings.

COMMUNITY SOLAR IS PERFECT FOR: Renters who pay their own electric bill. Homeowners with too many trees. Homeowners with small roofs and large electric bills. Condo and townhouse owners that live in communities that can't go solar. Electric utility customers who don't qualify for the Federal and NYS tax incentives.
