Cooling systems can be difficult to flush completely due to accumulated debris. Inadequate flushing can ruin a newly installed water pump and result in warranty problems and frustrated customers. Make sure you perform A complete cooling system flush by using clean water and compressed air. The Power Clean??? Flush Tool "water

The KC Heavy Duty Water Pump is designed to be an easy installation with a drop-in replacement that features a durable stainless steel 100mm impeller. The factory water pump in the 2004.5-2007 Super Duty is prone to failure due to its cheap plastic impeller, which can slip and break over time. The KC Heavy Duty Water Pump is a reliable solution to this ???

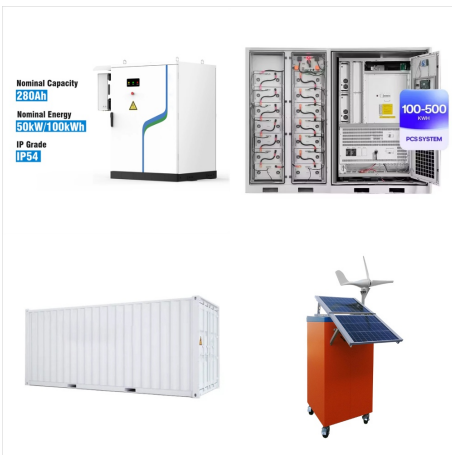

Your application works hard. Gates mechanical water pumps ensure your vehicle stays cool and runs smoothly. With fully tested bearings, seals and inline quality, find standard, heavy duty, and performance water pumps with coverage for imports, hybrids, and heavy-duty applications.

# HEAVY DUTY POWER SYSTEMS WATER PUMP

Why Choose a Gas Water Pump? More Power. Gas water pumps are more powerful and move much more water faster than other types of pumps. For heavy-duty applications like flood removal or draining a construction site, the higher gallons per minute (GPM) and PSI ratings on gas pumps make all the difference between getting the job done in two hours or twenty minutes.

We can supply, install, service or repair heavy duty industrial water pumps including: centrifugal pump, submersible pump, macerator pump. We have expertise in pumping solutions for all commercial applications. Our pumps are designed to meet the growing demands on infrastructure and demand for energy efficient systems.

This heavy-duty 3/4 HP sump pump will dependably remove water away from the home's sump basin. DEWALT Sump Pumps are built with the highest quality components including a durable cast iron base, corrosion-resistant stainless steel motor housing, 100% copper motor windings for a long-lasting motor and a piggy-back vertical float switch tested to
