

HeliaSol es una solución solar orgánica que ayuda a los clientes a convertir cualquier superficie en una superficie solar generadora de energía. HeliaSol son láminas solares orgánicas flexibles, ultraligeras y ultrafinas, lo que permite que más superficies se conviertan en generadoras de energía.

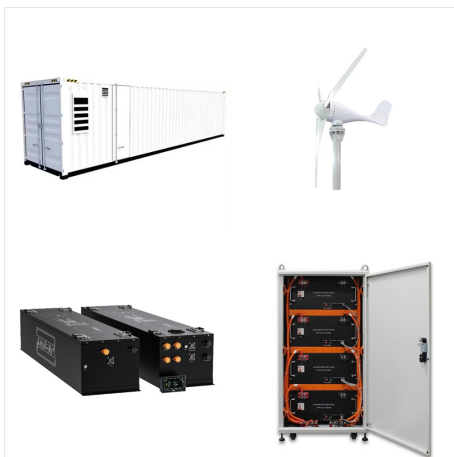

HeliaSol is a technology that enables 100% renewable solar power to be produced. It is a true green commodity-focused on the greenest of all solar technology and is one of the smartest generating technologies for electricity. Technical Data. VIEW THE APPLICATIONS.

HeliaSol is the perfect solution for retrofitting buildings where restrictions in terms of weight, static load restrictions or penetration of the roof material play a role. Elaborate substructures that penetrate the roof or rear ventilation for cooling are not required.

HeliaSol is the perfect solution for retrofitting buildings where restrictions in terms of weight, static load restrictions or penetration of the roof material play a role. Elaborate substructures that penetrate the roof or rear ventilation for cooling are not required.

Mit HeliaSol kann sauberer Solarstrom auf Dächern oder Fassaden erzeugt werden, die normalerweise keine PV Installationen zulassen. Ultra-Leicht. Flexibel. Wirklich Grün. Einfache Installation. Temperatur-unabhängig. IEC-zertifiziert.

HeliaSol is globally the only commercially available and IEC certified organic solar solution. Invented, developed, and manufactured by German engineering excellence, the solar films (not panels!), are light-weight, bendable, and truly sustainable.

HeliaSol is a product with which you can generate 100 percent clean solar electricity. But it is much more than that. HeliaSol is a truly green product and is based on the greenest of all solar technologies, making it one of the cleanest electricity generating technologies. Flexibility Environmentally Friendly Lightweight Ultra-thin.
