HILLBILLY GOLF TROLLEY LITHIUM BATTERY

A typical lithium battery has a cycle life of upwards of 2000 charges. Lead batteries, by comparison, have a cycle life as low as 500 charges potentially meaning you may only get a full season of golf from your new trolley with a lead-acid battery.

This updated version of the Hill Billy electric trolley features a Plug N" Play battery design that removes the need for wiring, simply slotting into place in a matter of seconds. We tested the trolley with a lithium battery (?359) that charges quicker and lasts a few years longer, but there's also a lead acid option at ?259.
