

What does HMA do?

We manufacture, distribute and service a wide range of capital plant equipment to a diverse range of industries. HMA Group companies deliver a wide range of products and services across many industries; including mining, processing, materials handling, water management, power generation and oil & gas.

Who owns HMA Power Systems?

Early in 2000, HMA Power Systems was purchased outright by FKI plc which was in turn purchased by private equity company Melrose plc in 2008.

What is the difference between Traxis BV and HMA Power Systems?

Traxis BV focussed on traction control equipment whereas the larger HMA Power Systems concentrated on its core business of medium to large AC generators, DC traction motors, associated control equipment, and service and repair work.

Find out all of the information about the Brush HMA product: power plant management system PRISMIC(R) PMS . Contact a supplier or the parent company directly to get a quote or to find out a price or your closest point of sale. Exhibit with us Power Management Systems (PMS) are dedicated microsystems providing intelligent automation for

HMA Group provides industry leading Geotechnical, Wear, Materials Handling, Power Generation, Instrumentation and Flow & Industrial Solutions. Smeltcam AT II Infrared Camera The SmeltCam AT II solid state infrared camera system from Diamond Power Controls & Diagnostics delivers vastly improved images of the smelt bed, the superheater area, or

HMA Group provides industry leading Geotechnical, Wear, Materials Handling, Power Generation, Instrumentation and Flow & Industrial Solutions. The HOBO RX3000 is a research-grade data logging station that combines greater measurement flexibility and an on-board LCD display in a rugged, easy to deploy package.

The HMA POWER SYSTEMS trademark was assigned a Serial Number # 75547210 ??? by the United States Patent and Trademark Office (USPTO). Assigned Trademark Serial Number is a Unique ID to identify the HMA POWER SYSTEMS trademark application in the USPTO.. The HMA POWER SYSTEMS mark is filed in the category of Computer & Software ???

Power Generation is a proud member of the HMA Group of companies who have been servicing the Australian market in excess of 50 years. Combined with the more than 100 years of experience of Diamond Power International, Inc we offer industry leading solutions for Power Generation, Pulp and Paper, Petrochemical and Heavy Industries.

HMA Power Systems bediende met name de markten voor grote generatoren, industriële aandrijvingen, tractie- motoren en de hieraan verbonden service gerelateerde diensten. > Brush HMA BV Industrial Products & Services Ringdijk 390b 2983 GS Ridderkerk Postbus 3007 2980 DA RidderkerkTelefoon: 0180-445801 (24 uur) Telefax: 0180-445814 E-mail

HMA Power Generations high energy cleaning systems delivers unsurpassed boiler cleaning quality, in less time than conventional cleaning. Count on consistent quality, with a reliable cap on time and dollar expenditures. We provide an industry proven boiler cleaning service for solid fossil fuel users bituminous, subbituminous or lignite fired

HMA Power Generation possesses an in depth knowledge of what is required to return maximum performance from your Sootblowing system. By keeping your system fine-tuned and in peak operational condition, you can expect to see immediate gains in several key areas including:

- Extended boiler run length;
- Increased boiler output;
- Improved boiler condition

HMA Materials Handling can also upgrade and retrofit real time weighing systems to existing train loading systems to increase loading performance and efficiencies. Examples of what can be done to improve throughput and/or reliability include:

- Upgrades and replacement bins and structures
- Replacement control gates and Loading chutes
- Upgrade or

HMA Materials Handling has designed numerous trippers, travelling stackers and ploughs over the years. Each system has exceeded the client's expectations through innovative design and a co-ordinated approach with the client or end user to guarantee that the machine suits the site requirements, flow rates, cost and functionality.

Geotechnical Systems Australia was founded in March 1987 and now forms the geotechnical division of the HMA group. The company designs, manufactures, installs and distributes geotechnical instrumentation for a number of industries, including mining and minerals; cement and quarry; civil and infrastructure; environmental; waste and water; rail and transport; and ???

HMA Group provides industry leading Geotechnical, Wear, Materials Handling, Power Generation, Instrumentation and Flow & Industrial Solutions. Pneumatic Piezometers The Pneumatic Piezometer is capable of monitoring pore pressure up to 2000 kPa, combining reliability, minimal dimensions, economy and extremely low diaphragm displacement (0.002 cc).

The Model 4200 Displacement Detector System is an Early Warning System. The displacement detector consists of up to 6 displacement sensor switches. The detector control unit is attached to a post.
