DRBD essentially functions as a "network RAID 1" block device without the need to rely on expensive shared storage solutions such as a SAN. Pacemaker ??? The cluster resource manager (CRM). Controls when and where cluster resources such as DRBD resources, mounted file systems, virtual IP addresses, Home Assistant, among others can actively

Hi, My Home Assistant storage is regularly full, so I have to delete some backups to continue using it. My first thought was that frigate was using most of the space, but after deleting all of the clips, snapshots and ???

Hello, Maybe I have seen this and maybe there are some floating around, but does anyone know of a good way to schedule daily or weekly backups in HA? With all the improvements which there is probably more than I need I cannot believe scheduling backups are not in HA by default. Yes, I am aware you can run manual ones. Just looking for something ???
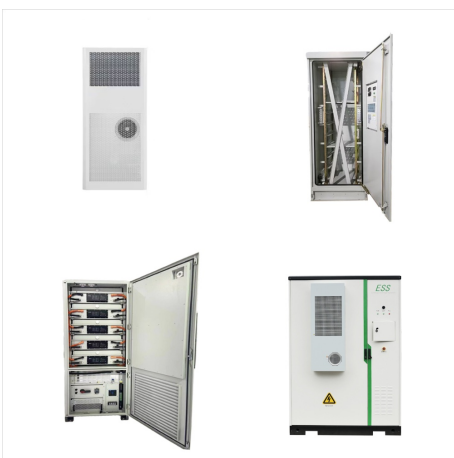

Can someone give me detailed instructions on accessing the hidden files in ".storage" ? I just got a brand new HA Blue and in the process of getting it going I somehow have the wrong username and password. Instructions under Authentication - Home Assistant mention deleting some files from .storage but nobody gives details on how to do it. Unfortunately SSH ???

Hello, Every few hours I get "Network storage device failed". The network storage is attached to Raspberry Pi (OMV) and is normally accessible from local computers when HA comes up with this message. After I hit "reload" the message disappears. Anyone experienced something similar?

Apparently there are now three frontend modes, storage, auto-gen, and yaml. I seem to be "stuck" in auto-gen mode I have been using HACS for awhile and since I ended up in auto-gen mode I have had this issue that ???

HOME ASSISTANT STORAGE SAN MARINO

Hi, it seems that my storage is almost full. I did had some messages in my Unifi controller (running as add-on on hassio) and a system metric shows that 97.7% is now full of disk: What can I do to check and free up disk space again? Home Assistant Community Disk almost full. Installation. Home Assistant OS. WTFoX74 (Martin) June 10, 2019, 2

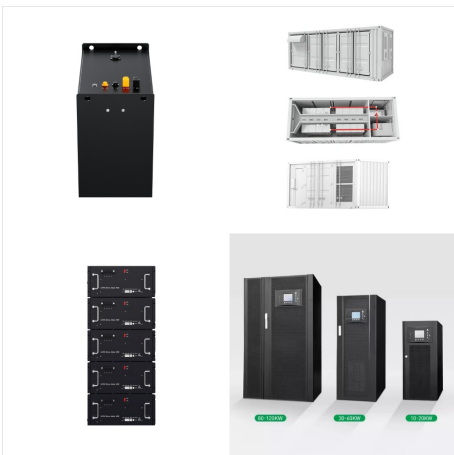

If the above steps to free up space did not help, you need to expand your storage. Expanding storage: Home Assistant Operating System . When you are running Home Assistant Operating System Home Assistant OS, the Home Assistant Operating System, is an embedded, minimalistic, operating system designed to run the Home Assistant ecosystem. It is

Home Assistant, being open-source, relies on the community and third-party tools for security enhancements, including WAF-like features. You can implement your own WAF solutions or use add-ons for enhanced security. Security ???

HOME ASSISTANT STORAGE SAN MARINO

The counter entities no longer restore their previous manually set configuration (using the - now deprecated - counter nfigure service) on Home Assistant startup. Instead, it will now use the configuration as set in the helper configuration in the UI (or as configured YAML, if used). This behavior is removed, as it caused configuration issues, as the new configuration ???

Home Assistant dashboards allow you to display information about your smart home. Dashboards are customizable and provide a powerful way to manage your home from your mobile or desktop. Easily create and customize your dashboards with drag-and-drop. Different card types to visualize your data and control your smart home devices.

Home Assistant 2023.6: Network storage, favorite light colors, new integrations dashboard Add and use network storage, the integrations dashboard got a revamp, add your favorite colors to your lights, copy & paste support for automations, blazing speed through Python 3.11, and ???

HOME ASSISTANT STORAGE SAN MARINO

I''ve got a python script that uploads all files (backup snapshot files) to Azure blob storage. I''ve created an automation that takes backup every week. I''m using Appdaemon for my python script but don''t understand how to trigger it. I want to trigger the script each night.

tl;dr - Running du -shc /* | sort -h from the SSH add-on will show most everything except add-ons. To see add-on sizes, run docker ps --size from console or SSH access into HAOS (not the add-on).. Running this from the SSH add-on will only show you the storage seen by the HA container (I''m probably wording some of this technically incorrectly).

I''m running HAOS on an RPi 4. Recently, the 32 GB SD card (this post isn''t about if you like HA running on an SD card) filled up and corrupted my database (no big deal), so a new database was started. This set me on a quest to find all of the files which were filling it up. I found a few GB worth of Amazon package images in the custom_components and from ???

HOME ASSISTANT STORAGE SAN MARINO

Hi there, I went through a guide to install and configure my Home assistant on a Virtual machine on my Synology NAS, and all is working perfectly, but I wanted to have a look and understand if my resources (CPU, storage, etc ???) were still ok, and I have some questions / unclarities ??? First, on my Synology Virtual machine, I see this ???

Hi, I have installed HA with Home Assistant Operating System approach on pi4, 128GB SD card. My recorder is set at 10 days. I configured some backup and store only one copy on local and the rest to Google drive. Recently I got warning about usable space is low (<10GB), I have no idea what eat up my space the most. I checked my log and only a few MB used. Is ???

Do you have any examples of /config/.storage (catalogs folders) Needs the fold for JS, and PNG, JPG, also i??? Hi, i wonder when you have HA Hassio in storage mode which folders should you have in "config / .storage". Home Assistant Community "config / .storage" HA Hassio. Configuration. chris4 (christian) March 7, 2019, 3:02pm 1

HOME ASSISTANT STORAGE SAN MARINO

Not running Proxmox myself, but my installation is running on ESXi. I expanded my storage simply by shutting down the virtual machine, increased the size of the virtual disk and then started it back up, Home ???

Not running Proxmox myself, but my installation is running on ESXi. I expanded my storage simply by shutting down the virtual machine, increased the size of the virtual disk and then started it back up, Home Assistant automatically claimed the extra space I had given it. 4GB RAM should be more than enough to run this, unless you use a a large amount of add-ons. ???

Home Assistant, being open-source, relies on the community and third-party tools for security enhancements, including WAF-like features. You can implement your own WAF solutions or use add-ons for enhanced security. Security management is more hands-on, requiring you to set up and configure security measures such as WAF.

HOME ASSISTANT STORAGE SAN MARINO

Home Assistant OS 5.12 core-2021.2.3 supervisor-2021.02.11. Virtual drive increased from 6 to 15 gig, still shows 6 gig within Supervisor-System. Gonna have to do some weird risky stuff to increase volume size???
