

What makes a good battery backup system?

Your backup system should be silent, fume-free plus there should be no need for a generator. Your battery backup system needs an automatic, easy switch over when the lights go out. You should be able, with ease, to run any appliance from your battery backup system provided it is within the power rating of that particular unit.

Do you need a battery backup system?

With a battery backup system you will be able to watch your favourite TV programme for hours on end. Standard battery backup systems are able to power your TV, computer and a couple of lights - if your battery backup system is not adequate you will be able to add more power onto the unit to increase the power.

Are backup power systems compatible with solar power?

All our Backup Power Systems are compatible with solar power, so you can start with just the Backup Power System, and then, later on, add solar panels. All systems are scalable, so you can start with the smaller system, and add another system, later on, to double up on the available peak power output.

What kind of battery backup power system does revov offer?

I am a... REVOV supplies the most cost-effective battery backup power systems in the market, including lithium iron phosphate batteries and all-in-one backup systems.

How does a backup power system work?

These systems are portable. It can be used by just plugging in the system that requires backup power to a multiplug and an extension lead. Alternatively, it can be integrated into your distribution board and supply specific circuits in your house with backup power. Note, this integration needs to be done by an electrician.

Can a battery backup system power a TV?

Standard battery backup systems are able to power your TV, computer and a couple of lights - if your battery backup system is not adequate you will be able to add more power onto the unit to increase the power. Read more about how power backup systems and insurance are related here.
