

How much does a 5 kW solar system cost?

As of January 2022, the average cost of solar in the U.S. is \$2.776 per watt (\$13,850 for a 5-kilowatt system). That means the total 5 kW solar system cost would be \$10,249 after the federal solar tax credit (not factoring in any additional state rebates or incentives). 5 kW solar panel prices: What are homeowners paying in your state?

How much does a 5kW inverter cost?

The cost of a 5kW inverter varies depending on the type of electricity system you have, with prices ranging from around \$800 to \$2,000. Installing solar panels in your home is just half the battle, maintaining them regularly is crucial for optimum efficiency of the solar system.

Is a 5kw Solar System a good option?

A 5kW solar system could be a great option for reducing your energy bill and decreasing your carbon footprint. A 5kW solar system can produce roughly 7,300 kWh of energy annually. If a family consumes the national average of electricity, the 5 kW system would cover about 69% of the total electricity needs.

How much electricity does a 5 kW solar system use?

The cost of electricity where you live is the biggest determinant of your solar savings. The table below shows the average estimated electricity production numbers for 5 kW solar energy systems in cities across the U.S. By comparison, the average household in the U.S. uses 893 kilowatt-hours (kWh) a month, which equals 10,715 kWh per year.

What factors affect the cost of a 5kw Solar System?

Apart from the location, there are more factors affecting the 5KW solar system cost, such as solar panels, charge controllers, and inverters. Solar panels come in different sizes, types, and shapes, and these factors can affect the cost of the solar system. Among them, the type of solar panels plays an important role.

Is solar affordable in Washington State?

From the table, there's a lot to take away if you're a U.S. homeowner. The bottom line is that you can never assume where solar will be affordable because even rainy Washington is one of the best states for solar
