Harness the power of the sun with Solaris Green Energy, your go-to source for renewable energy solutions in Thailand. Our offerings include a diverse selection of the latest solar products ??? from solar panels and inverters to complete solar ???

A 2kW solar panel system typically consists of 6-8 solar panels (depending on panel quality) and has a surface area of 10-15m². A 3kW system typically consists of 8-12 solar panels and covers a surface area of 15-20m². Because a 5kW system typically consists of 15-20 panels, the total rooftop space required for a 5kW system is between 25 and 35m².

Upgrade to my solar system. Most people would think that my current solar system was already overkill: 32 x 350 watt = 11.2kw 10kW Hybrid off-grid Inverter 16 Deep Cycle Gel Batteries 12V 200AH = 38.4kWH. But I am trying to be Off-Grid and during the rainy season, which was much longer than usual this year, I am not.

Being in the solar installation business since 2010, Kunini is a Solar EPC Contractor based in Thailand, installing solar rooftops for SME, Commercial and Industrial properties. Offering three types of systems, namely on-grid, solar hybrid and off-grid, the flexibility in choice allows you to choose a suitable system that will fit your needs.

Explore the leading solar power system suppliers in Thailand, known for their innovative solar solutions, ranging from high-efficiency panels to comprehensive energy storage systems, paving the way for a sustainable future.

Use electricity in remote regions of Thailand: If you want to build a house in a remote region of Thailand that doesn't have electricity available nearby, an off-grid solar system is a great option.

Can Solar Energy Power an Entire House in Thailand? The prospect of running households entirely on solar power garners widespread interest. Thailand's favorable geographical positioning and abundant sunlight render it conducive to solar panel installations.

Pair with solar and recharge with sunlight to keep your appliances running for days. Find out how you can take control over your home's energy with solar and Powerwall. Powerwall is a battery that stores energy, detects outages and automatically becomes your home's energy source when the grid goes down.

We use the finest quality solar panels, from top brands like Jinko and LONGi, to ensure that your solar panel system is built to last. We offer a 25 year warranty on all of our solar panels and each system is guaranteed, giving you peace of mind.

Can Solar Energy Power an Entire House in Thailand? The prospect of running households entirely on solar power garners widespread interest. Thailand's favorable geographical positioning and abundant sunlight ???

Solar PV System or Solar cell is a power system designed to supply solar power. The Solar PV panel uses semiconductors to convert sunlight into direct current (DC) electrical power. The generated power can be used with various electrical appliances such as television, refrigerator, air conditioning unit, computer, etc. Lesser electrical power will be taken from the national utility grid.
