

Many standby generator options in the \$2,000 to \$7,000 range can power a standard American home. But the average generator cost, including installation, is \$9,000. By comparison, a 10 kilowatt-hour (kWh) home backup battery costs about \$8,000 after incentives. If you want whole-home power, you'll probably need more storage than that, though.

For complete energy independence, pairing a battery system with solar panels and a generator ensures a reliable power supply without relying on the grid. This setup is advantageous in remote areas or for avoiding grid uncertainties. automate backup power for home or business, set time-of-use preferences, track energy use trends, and monitor

A UPS (Uninterruptible Power Supply) is a backup battery that keeps the equipment plugged into it running in the event of a power outage. It's not just a glorified power bank, because the UPS detects interruptions in the power and automatically switches the connected devices to running off the UPS battery, so they don't shut down.
