

What is a CR2032 battery?

The CR2032 is a widely used 3V lithium coin cell battery found in many electronic devices. Its name comes from its dimensions: 20mm in diameter and 3.2mm in thickness. The "CR" prefix signifies that it is a lithium manganese dioxide battery, known for its long shelf life and stable voltage.

What is the difference between CR1632 and CR2032 batteries?

A CR1632 battery would have the same height and voltage of the CR2032 but would have a diameter that is 4mm too short to securely fit in the same device. It is important to understand the specifications of your device's battery in order to get the best use out of the battery.

What are the advantages of the CR2032 lithium battery?

The CR2032 lithium battery offers several advantages: Long Shelf Life: Lithium batteries have a long shelf life, often up to 10 years, making them ideal for devices that require a reliable power source over extended periods. Stable Voltage: The CR2032 provides a stable 3V output, ensuring consistent performance in electronic devices.

What is a 3V Lithium battery CR2032 & CR123A?

3V lithium batteries like the CR2032 and CR123A play a vital role in powering everyday electronics. By understanding their characteristics, advantages, and proper usage guidelines, consumers can make informed choices that enhance device performance and longevity.

How long do CR2032 batteries last?

The construction of a typical CR2032 battery features a stainless steel case to prevent any leakage of the non-corrosive electrolyte. A long storage life is made possible by the typically low self-discharge rate of LiMnO₂ batteries. These batteries can lay dormant for years and lose very little of their original charge.

What ohm is required for a CR2032 battery?

Please set the resistance so that the maximum current shown in the right table is not exceeded. For example, say a CR2032 battery is used in sample circuit (A) in combination with a main power source 5 volt. Since the permitted charge current is 10mA and this battery's voltage is 3V, 0.2k ohms required.
