

Why did Huansheng solar win the best reliability Award?

Large-size module maker representative Huansheng Solar was entitled with the Best Reliability Award for its excellent performance under mild weather condition and distributed application at Solarbe Test held on March 10 in Foshan, Guangdong Province.

How reliable are Huansheng modules?

The outstanding performance of Huansheng's modules in this test fully demonstrates the high reliability in its life cycle. Distributed project is one of the most potential application scenarios. Modules used in distributed applications are often accompanied by more severe high-temperature conditions, which test its high-temperature resistance.

Which country has the most potential for China's photovoltaic industry?

The mild climate represented by East China, which has the most potential for China's photovoltaic industry, has higher humidity compared with the dry and hot climate and greater diurnal temperature difference compared with the humid and hot climate, which tests the weather resistance of solar modules in many aspects.

On November 15, 2021, Maxeon Solar Technologies, Ltd (the "Company") and SunPower Systems International Limited ("SPSI") entered into an amendment to the Amended and Restated Business Activities Framework Agreement ("BAFA Amendment") signed in February 2021 with Huansheng Photovoltaic (Jiangsu) Co., Ltd ("Huansheng JV"), Huansheng New Energy a|

In Huansheng during April average daily high temperatures increase from 44°F to 61°F and the fraction of time spent overcast or mostly cloudy increases from 46% to 50%. The average daily incident shortwave solar energy in Huansheng is gradually increasing during April, rising by 0.8 kWh, from 4.6 kWh to 5.4 kWh,

It is considered the largest single-unit capacity solar project on the DC side in Uzbekistan. Huansheng Solar is providing all the modules for this project. The first shipment of 300 MW modules consists of Huansheng Solar's n-type G12-68P high-efficiency shingled modules, measuring 2413 x 1303 mm, with mass production power reaching 715-720 W.

Dongfang Huansheng Photovoltaic Company General Information Description. Manufacturer of solar cell and module in China. The company develops and supply commercial PV products with low-cost, high-reliability and high-efficiency as its core competitiveness, which ensures its leading position in the technology innovation of shingled module.

In addition, in 2019, Zhonghuan became the controlling shareholder of Huansheng Solar by acquiring 40% equity held by Dongfang Electric. In the past few years, Huansheng Solar has become a rising star in the module market. Besides, by acquiring shares in Maxeon Solar, Zhonghuan has further extended its cell and module production capacity, while
